

KK 37 EKV

KK 37 EKV en KK 37 TCB

The flexible sanitary unit in the EKV and TCB layouts has its cassette contained in a cabinet. This can, of course, be fully screened off using the foldable wall. A full-length mirror is fitted as standard.

The stylish combination of the Lugano Birne panels, the cream-white elements and the various upholstery possibilities is a feast for the eyes. The ambiance is enhanced by the many LED spot-lights, and there are two adjustable halogen reading lights on a light rail. And take a look at the indirect lighting in the extended pop-top, that enhances the spaciousness of the Kompakt.

# Kip Kompakt

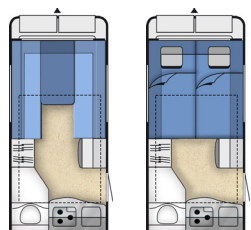

Trend-setter in active camping

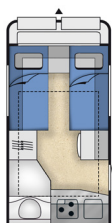

KK 37

KK 37 EKV

KK 37 TCB

## The new Kip Kompakt. Trendsetter in active camping.

Completely new from front to back, from top to bottom, and inside and outside: the Kip Kompakt. This is the sporty, nimble lightweight that goes perfectly behind smaller cars and, with its pop-top, fits in the carport too.

The Kompakt has a striking design full of great details: just take a look at the steel hand grips. A clever feature is the external gas connection in the front locker so you can cook some great meals outside or in the tent.

Its small outer dimensions hide a caravan of real size. You'll be impressed with the inside height of 2.03 m with the pop-top extended, and with a bed size of at least 2 m length by 1.70 m width.

Choose the Comfort Inclusive Package with your Kip Kompakt, with a.o. a spare tyre and jack, screen door and even floor heating. Other optional extras are also available, such as alloy wheels and an extra storage hatch – you choose how you want your Kompakt to be. Whatever you choose to do, the basic Kip Kompakt is a beautiful place to start!

Weight from  
**755 kg**

Total length  
**550 cm**

Height  
(pop-top closed)  
**225 cm**

Total width  
**183 cm**

Startling and practical design details. The upper cabinets, for example, have tasteful indirect lighting.

The Thule Omnistor bicycle rack is one of the many accessories that are available – just ask your Kip dealer.

The external gas connection (optional) in the front storage offers you additional cooking flexibility.

KK 37 EKV

And it is not only the exterior where the new Kip Kompakt shines. Its interior, with several upholstery choices, is designed with the same level of detail. The spacious dinette of the TCB layout is easily turned into two comfortable beds with slatted base or one large bed!

## The smart Kip Kompakt. Familiar yet surprising!

The Kip Kompakt has had dedicated followers for decades. That's a good reason to keep it familiar. With its roof folded, the Kompakt offers all the advantages of a low caravan: less wind resistance, manoeuvrability and easy to store. With its roof extended it offers you standing room of 2.03 meters and superb ventilation. The completely new interior will get your attention with its tasteful contemporary styling and ingenious design: for example, all cabinet doors have dampers. The Kompakt is ready for the future, ready for years of active and comfortable holidays.

The Kompakt (model shown is the EKV and TCB) shows you how a small caravan can be big: a generous double-bed, 200 cm long by 170 cm wide. Sleep well! The TCB layout also offers the possibility to have two single beds.

The widest kitchen with the biggest worktop in the Kip range is in the Kompakt EKV and TCB. The hinged cream-white cover on the cassette toilet cabinet adds even more work space when it's folded down. The stainless-steel sink and hob both have attractive glass covers.
